Focus on isotopic innovative research

Orbitrap IRMS, GC-C/P-IRMS, Py-GC-C-IRMS, LC-MC, GC-MS, OA-ICOS lasers...

Collaborations with local and international partners

(François Fourel)

(Camille Bathellier)

(Keita Yamada)

**Utrecht
University**

(Alexis Gilbert)

An aerial photograph of Lyon, France, showing the Saône river winding through the city. In the foreground, the ornate copper-clad dome and the winged statue of the Virgin Mary on the roof of the Basilica of Notre-Dame de la Fourvière are visible. The city is characterized by its dense, colorful buildings with red-tiled roofs. The text is overlaid in white on the lower half of the image.

UNESCO world heritage city
World-famous gastronomy
Town rich in history and archaeology
